

Nikola Smileski

Software Engineer

+ Experience

EXTFOX – Full-stack Developer May 2025 – Present

Specializing in Shopify store development, I build and optimize custom e-commerce solutions as a full-stack developer. I implement responsive front-ends, custom themes, Liquid templates, and integrate APIs & third-party apps to enhance functionality, performance, and user experience for various clients.

MVP Masters - Product Engineer December 2024 – March 2025

Developed scalable full-stack web applications using Next.js and NestJS. Built & maintained REST APIs, integrated PostgreSQL, Firebase/Firestore (real-time), Elasticsearch for search, and implemented web scraping pipelines. Collaborated with teams to design, ship, and optimize high-performance features.

Founder & Lead Developer

Sklopi.mk - Personal project (launched 2024)

Created an automated Macedonian platform for comparing computer component prices & specs from multiple local stores. Built advanced daily web scraping system, data processing pipeline, and intuitive UI for easy product selection and purchase decisions.

InTec System - Software Engineering Intern March 2024 – June 2024

Worked on document management systems (DMS) and process automation. Focused on React front-end development — created user interfaces, integrated core DMS features, and gained hands-on experience building efficient, scalable web applications.
